

I work for a Community Television station in Manchester NH, we serve a population of over 100,000 in allowing individuals to use our resources to "build community".  
Haitians come here to tell their 3,000+ population about the differences of US laws.  
Preachers come here to gather their flock and seek those uninspired.  
Democrats and Republicans come here to fight for political justice.

LPFM opportunities has been the hope of this organization for several years... PLEASE consider opening the application window this summer... We have no radio outlet for our community building.

Everything is owned by a network. Please let us have our own local voice again: LPFM gives us that venue... thank you for your time.
